

BLOCKCHAIN REVOLUTION

BY
ASHWATHI V
CSE-2nd YEAR

WHAT IS BLOCKCHAIN?

❖ Collection of records linked with Each other.

- Decentralization
- Digital Ledger
- Cryptography

Famous Cryptocurrencies used in Blockchain having different Hashing Algorithms.

- BITCOIN-SHA256
- ETHEREUM-ETHASH

Cryptographic System to Secure Transaction:

❖ There are two main Keys for Cryptography purpose in Blockchain

- Public Key
 - seen by all in Encrypted form.
- Private Key
 - Only user knows in decrypted form.

Encryption

Decryption

Safe Transaction Using Blockchain

SENDER

Public Key

Encrypted Message

Private Key

RECEIVER

Ex:E-mail Address

Ex: Password

Mining and Incentives:

- **MINERS-(Proof of Work)Solve the Complex Mathematical Problem to add new Blocks to the Blockchain.**
- **Successful Miners are rewarded with newly created CryptoCurrency.**
 - Mining Rewards
 - Transaction Fee

SMART CONTRACTS

- Self Executing Contracts with term directly written into Program

HOW TO BECOME BLOCKCHAIN DEVELOPER?

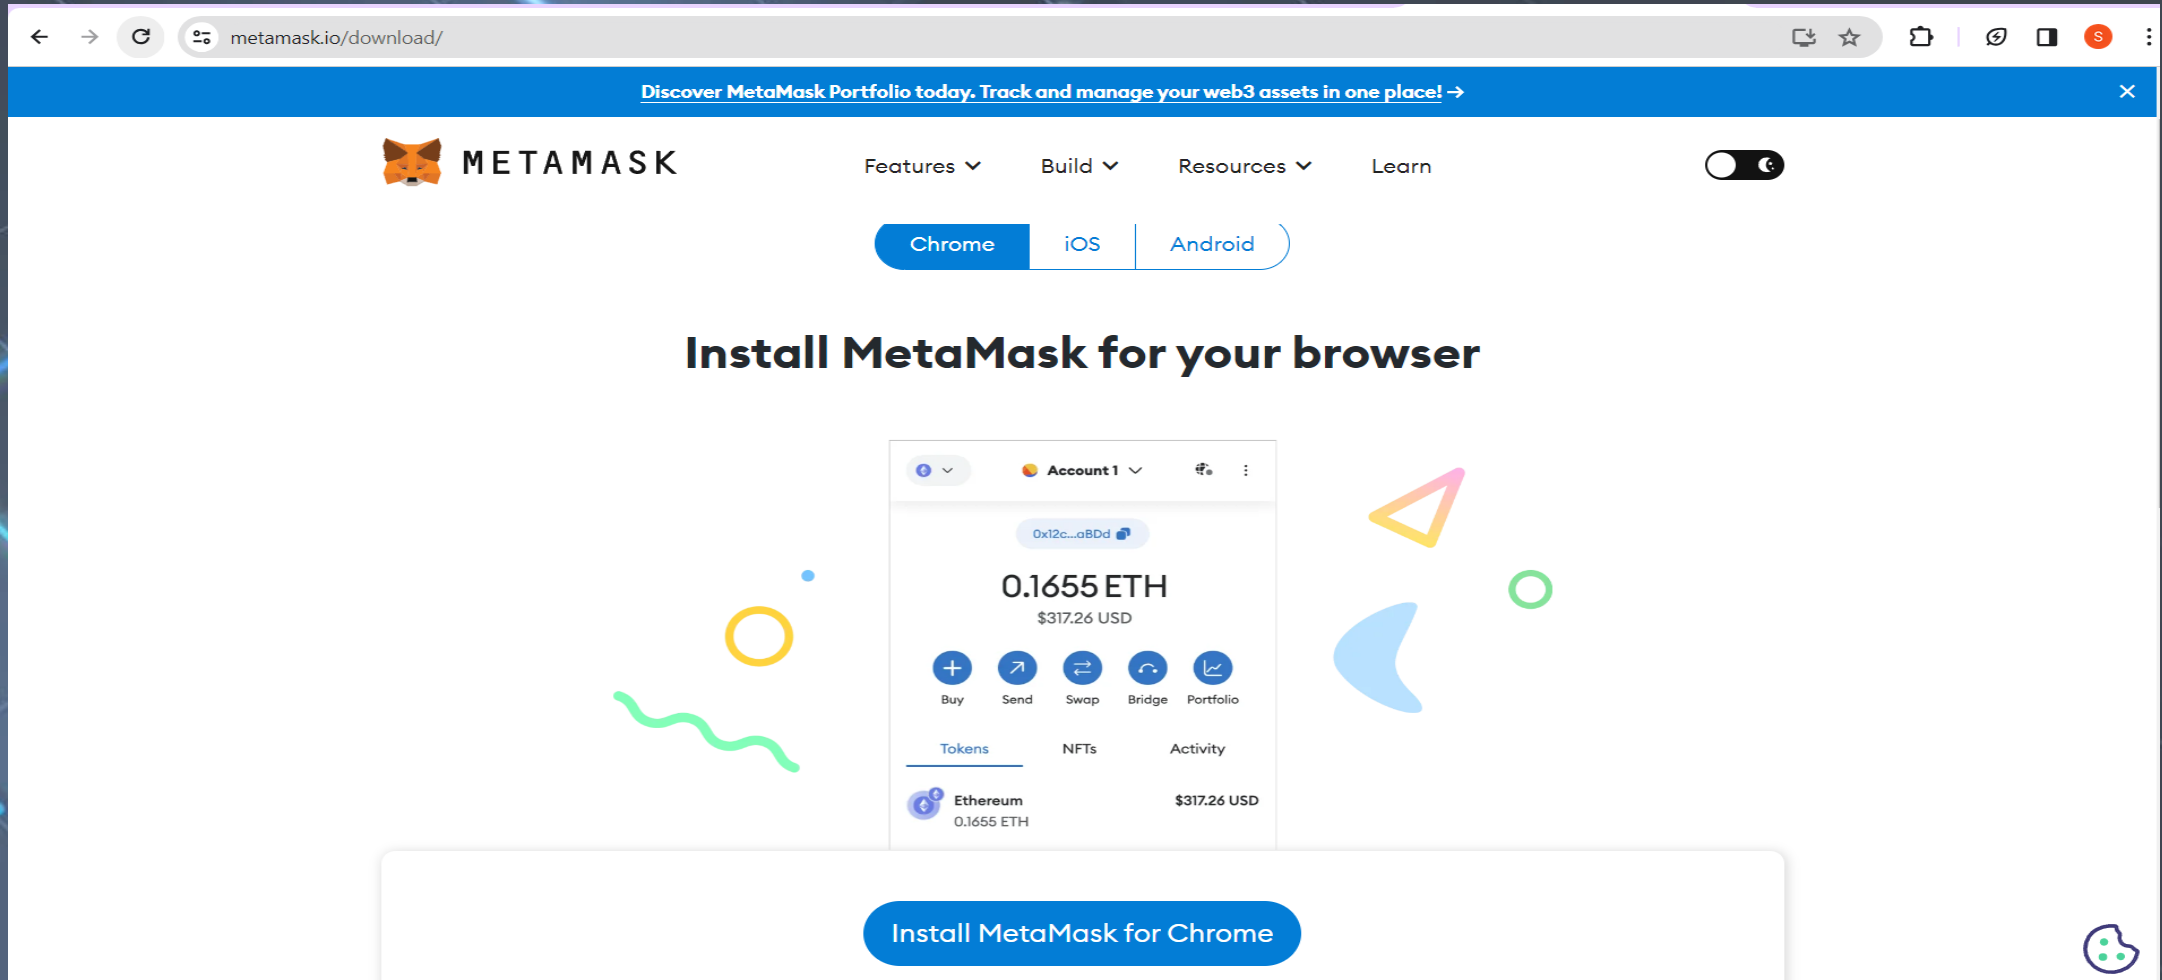

- Program language varies according the Blockchain Platform.
- Easiest language to choose-Ethereum Network (Test Network),

➤ Solidity

- Also Solana.

Accessing Public Blockchain Platform is Easy
